Find Analogues

SPY data through 2026-05-15

Found 3 analogues · 126-day window · current period: 2025-11-13 → 2026-05-15

⚠ Historical pattern matching is not a forecast. Past analogues provide context, not certainty. This tool surfaces structural similarities – macro conditions, policy, and fundamentals differ across periods. Always apply independent judgment.

Panel 1 – Pattern Match

Current 12-month SPY shape (white) vs the three closest historical periods. All normalised to 0% at their own start dates – comparing shape, not level.

Current (2025-11 →)

1996-12 – 1997-06

2016-06 – 2016-12

1996-04 – 1996-10

Panel 2 – What Happened Next

All three analogues anchored to 0% at today. Read as: if history rhymes, here is the range of outcomes.

◆ WEIGHTED INTERPRETATION

Phase 2: macro active

6MO

12MO

24MO

+11.0%

+30.8%

+42.3%

Weighted expected returns: +11.0% (6mo) · +30.8% (12mo) · +42.3% (24mo). Analogues suggest a strongly bullish outlook. Ranked by a 50/50 blend of price-pattern and macro-regime similarity (Fed stance, yield curve, CPI trend, credit spreads).

Panel 3 – Sector Rotation

Analyse Sectors

Which sectors outperformed SPY in the 6 and 12 months following each analogue period. Ranked by consistency × magnitude.

Click Analyse Sectors to compute sector rotation across all analogue periods. Fetches ETF and proxy stock data – allow 20-40 seconds on first run.
